CAREER OBJECTIVE

Final-year Computer Science Engineering student with hands-on experience in web development, database management, and API integration through self-built projects like MelodyStream and TaskFlow. Seeking an opportunity as a Software Engineer / Developer Trainee to apply strong problem-solving and coding fundamentals, contribute to real-world software projects, and grow within a collaborative, learning-driven organization.

PROJECTS

MelodyStream – Music Streaming Web Application

- Designed and developed a responsive music streaming interface inspired by modern platforms (e.g., Spotify) using HTML, CSS, and JavaScript.
- Implemented dynamic UI components and playback controls, focusing on clean, mobile-friendly layout and cross-browser consistency.
- Applied core front-end fundamentals including responsive design, DOM manipulation, and clean UI/UX practices.

TaskFlow – API-Based Task Management System

- Built a CRUD-based application integrating RESTful APIs to create, read, update, and delete user task data efficiently.
- Worked with SQL/MongoDB for structured and unstructured data storage, reinforcing database design and query skills.
- Applied clean coding practices and modular design to build a scalable, maintainable backend workflow.
